# About Construction Workers

Construction Workers are important because they build houses that we live in, and they fix the highways and roads.

Construction Workers have a lot of gear. Small tools and big machines help them build.

Construction Workers wear special gear' hard hats, safety glasses, tool belts, and gloves to protect them from getting hurt.

Construction Workers also wear a tool belt that carries tool supplies.

Construction Workers use other big and small machines to help them build.

Construction Workers use dump trucks, diggers, loaders, and bulldozers are all types of construction vehicles.

These big machines help to build roads, bridges, tunnels, and tall buildings.

Some construction vehicles carry building materials.

Others have tools for digging, lifting, and pushing.

### Diggers

Digging machines, or Excavators', work by pushing a metal bucket into the ground so that it fills with dirt.

## Loaders

A loader scoops up dirt in a big, wide bucket. Then the bucket is lifted over a truck and, the dirt is tipped into it.

## Concrete Mixers

Construction Worker needs a lot of concrete. Concrete is made by mixing sand, stones, and cement with water.

Once the sloppy mixture has been poured, it sets as hard as a rock.

Concrete is brought to the construction site by mixer trucks. The concrete is carried in a big drum, which keeps turning to stop the cement from setting hard.

## Bulldozers

Bulldozers are big, powerful machines that are used to move dirt and rubble. A blade at the front of a bulldozer scrapes up the dirt and pushes it along in front.

Bulldozers are used to clear the land to make it ready for building. They can flatten a big area very quickly.

## Road builders

Before a road can be built, the ground has to be made very flat.

Bulldozers and machines called scrapers, and

graders are used to flattening the area.

## Dump Truck

Before building work can begin on a construction site, huge piles of dirt and rubble may

need to be shifted. Dump trucks and tipper trucks do this work. Big trucks also

deliver sand, gravel, bricks, and other building

materials to the construction site.

# Fill My Tools Boxes

- Cut out the label on page 2 and past them in the tools boxes.
- Colour the tools

# Fill My Tools Boxes

- Cut out the label below and paste them in the tools boxes on page 1.
- Colour the tools
